## Въпрос 7

What will be the output from this piece of code?

```
class Person {
public:
    void setName(std::string & name){
        _name = name;
    }

    std::string getName(){
        return _name;
    }
private:
    std::string _name;
} ;
int main() {
    std::string name = "Manol";

    Person p;

    p.setName(name);

    name = "Trifon";

    std::cout << p.getName();

    return 0;
}
```

## Отговори

☐ ManolTrifon;

- ☒ Manol;
- ☐ The value is unpredictable;
- ☐ Trifon;
